HOW TO SEE - YouTube

With the unaided eye, most people can see stars that are of magnitude 6.5 and brighter. On most days, you should be able to spot the major constellations seen along the direction of the Milky Way. From Earth, there are 30 constellations that are visible in the area of the Milky Way galaxy.

How to See the Milky Way in 5 Easy Steps * Space Tourism Guide

If you visit the park, you will be one of a very select group. Few people actually see this park because it is not easy to get to-you can't drive to the islands. A short but exciting ocean voyage or a commercial flight in a small airplane is required. The park is one of the least visited of all of America's national parks.
