Cognitive maps are tools for thinking and problem solving. They are intended for unraveling mental models and mapping how people think about a certain issue or problem. The main building blocks of cognitive maps are called “concepts.” The concepts are generated during an interview process using the words used by the interviewee (Pidd, 1996).

Systems Methodology - The Systems Thinker

The systems thinking tools fall under several broad categories: brainstorming tools, dynamic thinking tools, structural thinking tools, and computer based tools. Although each tool is designed to stand alone, they also build on one another and can be used in combination to achieve deeper insights into dynamic behavior.
